(a) Local token vs. candidate fit

Counterexample
Lower local token KL does not necessarily imply lower complete-candidate KL.

VG-MLP	VG-GRU
0.0882 0/0768	0.0827 0/1020

(b) Preferred-prefix disagreement

Scale note
Axes are truncated: KL starts at 0.06; disagreement starts at 10%. Data unchanged.
